

# CASA MAJANI

Punta Mita, Mexico

Casa Majani, located in the St Regis/Four Seasons gated community, is a fully staffed six bedroom oceanfront villa. World-renowned architects Manolo Mestre and Juan Collignons holistic approach to architecture pays homage to the natural while incorporating the contemporary. As premiere eco-sensitive designers, both Mestre and Collignon embrace native simplicity and warmth of color to complement modern convenience, providing an alluring and meditative experience. A network of pathways through expansive reflection pools connect each unique structure, creating the illusion that Casa Majani is suspended over the powerful Pacific
